The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 93, 97, and 98 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Moore et al (U.S. Patent Application Publication 2001/0021700). Moore et al teaches the diagnosis and treatment of immune system disorders by monitoring the expression of a gene involved in hematopoiesis (*e.g.*, see paragraph 0198) and further teaches assaying nucleic acids as a measurement of gene expression (*e.g.*, paragraphs 0013, 0015, 0016, 0019, and 0583-0589). Applicants' arguments (response filed July 1, 2008, pages 8-10) are not convincing because the diagnosis in Moore et al broadly fits within the definition of assessing the immune status of an individual. Claims 93, 97, and 98 should have been included in this rejection in the Office action mailed April 1, 2008. The error is regretted.

Claims 92 and 94-96 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
